COLD KILLERS

WINDWEAR SOFTSHELL COLLECTION

COLD KILLERS

SOFTSHELL COLLECTION

ENGINEERED TO ELIMINATE
WIND CHILL.

FITTED TO KEEP
THE EXTREMES OUT

ACTIVE STRETCH
SOFTSHELL FABRIC

The Cold Killers Softshell collection has been re-engineered for 2009 with a focus on style, fit, soft feel and overall comfort.

The new collection features Softshell fabric providing active stretch, windproof and breathable performance combined with great water resistance. The Softshell fabric is a three ply laminate with a very tough and tightly

woven stretch fabric on the outside with a cosy 3D fleece liner. In between is a laminated membrane, which assists weather protection.

These three elements work together to deliver an incredible balance of protection against wind and rain, excellent breathability, balanced warmth and dynamic soft stretch fit.

The technical combination of Softshell fabric and 3D fleece allows warm air to circulate easily, thereby dramatically reducing the overheat/chill-down cycle associated with conventional layering.

COLD KILLERS SPORT TOP

TECHNICAL SPECIFICATIONS & PRODUCT DETAIL
